

North Road Medical

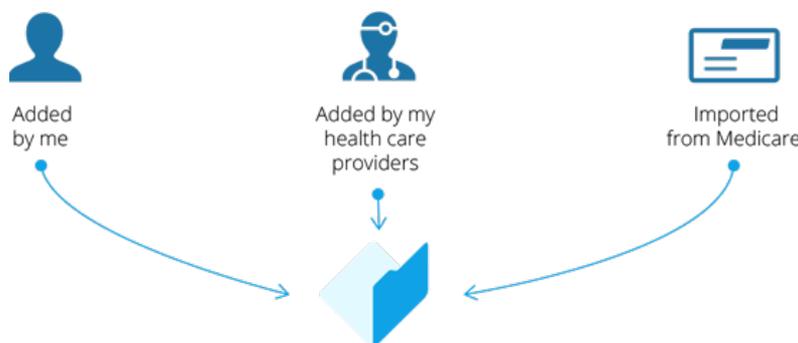

Caring medicine to the whole family

My Health Record

An online summary of your health information

My Health Record is a national secure online summary of your health information. Having a My Health Record means your important health information like allergies, medical conditions and treatments, medicine details, test or scan reports can be accessed through one system. Healthcare providers like doctors, specialists and hospital staff can see it online from anywhere at any time when they need to, like in an accident or emergency.

My Health Record won't replace the existing records with your doctor, but will allow for more information to be added and accessed, for example, for medical consultations, for blood tests and x-ray reports, and as prescriptions are filled. Your doctors will still store notes in their local systems.

Download the Medicare App onto any smartphone to be able to access your Health Record - Express Plus Medicare

You are able to monitor who has accessed or updated your My Health Record through the access history.

You can control who accesses the information in your My Health Record.

Directors

Dr Patrick Casey
Dr Noelene Jacka
Dr Daniel Mann Segal

Doctors

Dr Lynette Hatherley
Dr Yulya Gorovy
Dr Millie Leykin
Dr Simon Cooper

Practice Nurses

Linda Gore

Benefits of having a My Health Record

1. Better Access:

Your important healthcare information will be available in one place online that is easily accessible by your authorised doctors, specialists, or hospitals.

Even if you move or travel interstate, the information can be viewed securely online, anywhere, any time. If you want, you can access your health information from any computer with an internet connection. You control who can see it. Once it's set up you don't need to do anything.

2. Improved Safety:

In a medical emergency, healthcare providers connected to the My Health Record system can see your health information to provide you the best possible care quickly.

If you want, you can list any allergies, adverse reactions and medical conditions you may have to help healthcare providers give you better advice and treatment.

3. More Convenient:

You won't need to worry about having to remember and repeat your health history like medicines, details of chronic conditions, and dates of recent tests with different or new healthcare providers. The same goes for your children's health history like immunisations and medical tests.

4. Strong Security:

If you choose to you can control who sees what information in your My Health Record.

There are strict rules and regulations on who can see or use your My Health Record to protect your health information from misuse or loss. There are penalties for anyone who breaks these.

5. Privacy Matters:

We respect your privacy.

To create a My Health Record, we will collect information about you and your children from Medicare and some other government bodies including your name, date of birth, and Medicare records from the last two years. Registered healthcare provider organisations such as general practices and hospitals will be able to access your My Health Record when providing healthcare to you.

[Register or access a My Health Record](https://myhealthrecord.gov.au/internet/mhr/publishing.nsf/Content/find-out)

The information stored on My Health Record can include:

Clinical documents about your health - added by healthcare providers including:

- Shared Health Summary
- Hospital discharge summaries
- Pathology and diagnostic imaging reports
- Prescribed and dispensed medication
- Specialist and referral documents
- Medicare and PBS information stored by the Department of Human Services and Medicare
- Organ Donor decisions
- Childhood Immunisations

Personal health notes written by you or an authorised representative including:

- Contact numbers and emergency contact details
- Current medications
- Allergy information and any previous adverse reaction
- Indigenous status
- Your living will or advance care planning documents

Please speak to your doctor to upload a summary of your health information to your My Health Record at your next consultation.
